Almost every organism has the tendency to react to certain stimuli for survival. This reaction to each and every situation has an evolutionary basis of adaptation. The study of human emotions dates back to the 19th century and psychologists have since then discovered many reasons for every emotion, yet these are just theories. The arousal of emotions and their assumed structures is said to occur due to repeated encounters with a situation followed by the adaptation of the encounter. Human emotions have been linked to adaptively regulate emotion-gathering mechanisms. The emotion of fear which is associated with ancient parts of the brain has presumably evolved among our pre-mammal ancestors while the emotion of a mother's love called the 'filial emotion' has seen to evolve among early mammals. Various emotions work as manipulative strategies that favours survival. Feigning emotions by an accused person may help him be saved from the punishment. An exaggerated display of anger is also associated with manipulating or threatening someone.

Despite there being several emotions for various events, ironically the most interesting emotion is the emotion of disgust. Disgust is aroused when the body senses a danger to the immunity or the physiology of the human. The disgusted memory is associated with alerting the brain of a potentially dangerous substance. A few studies have shown that the encoding triggered in adaptive memory for problems is stronger than any other behaviour. This makes us instantly have a disgusted expression at the sight of something that makes us uncomfortable or uneasy. These expressions are also closely linked to self-protective communication.

एक अच्छा साहित्य मनुष्य जीवन तथा समाज की उन्नति, उत्थान तथा सुचरित्र के निर्माण में सहायक होता है। मानव मस्तिष्क की परिपक्वता तथा विचारों के प्रस्फुटन में साहित्य का बड़ा महत्व होता है। आदर्शवादी गुणों के उद्भव एवं चरित्र में उसके प्रयोग की प्रेरणा साहित्य ही प्रदान करता है। इसकी अद्भुत शक्ति का प्रयोग कई इतिहास प्रसिद्ध हस्तियों ने किया, जिसके कारण आज हम उन्हें महापुरुषों के रूप में याद करते हैं।

जीवन का अन्य नाम गतिशीलता है वह विचारों के रूप में जन्म लेकर जीवन को गति प्रदान करती है। विचारों के जनक साहित्य ही होते हैं। वर्तमान में हम अपने समाज एवं देश के जीवन, संस्कृति को भ्रमण कर लोगों से जानकर पता कर सकते हैं। मगर पुरा काल के जीवन की झलक केवल उस समय के साहित्य में ही मिल सकती है।
